PROFESSIONAL SUMMARY

Result-driven Full Stack Engineer with 5+ years of experience scaling production-grade web applications. Strong background in computer science with proven expertise designing scalable backend services using Node.js, TypeScript, and Python/Django. Adept at owning features from system design to cloud deployment, managing CI/CD pipelines, diagnosing complex production bugs, and seamlessly bridging the gap between infrastructure and frontend teams.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), HTML/CSS/SCSS

Backend & Architecture: Django, Node.js, NestJS, RESTful APIs, Apollo GraphQL

Frontend Ecosystem: React.js, Next.js, Vue.js, MUI, Vite

Databases & Infrastructure: Docker, AWS (Lambda, S3), PostgreSQL, MySQL, MongoDB

Tools & Methodologies: Playwright, Cypress, Claude (AI Assistant), Git, CI/CD pipelines, JIRA

PROFESSIONAL EXPERIENCE

Ethos Innovations Inc.

October 2022 - Present

Lead Front-End Developer (Part-time)

Remote

- Spearheaded the development of a government web application** using React, TypeScript, and AWS, architected with **Vite** for high-performance builds and faster development cycles.
- Ensured mission-critical reliability** by implementing an automated testing suite with **Playwright** to guarantee end-to-end quality and regression coverage.
- Accelerated feature delivery and code quality** by integrating AI coding assistants (e.g., Claude) into the development lifecycle to streamline complex problem-solving and documentation.

Comfac Technology Options

December 2024 - June 2025

Frontend Developer (Contract)

Remote

- Engineered scalable frontend features** using React, TypeScript, and GraphQL, implemented within a **micro-frontend architecture** to enhance modularity and team autonomy.
- Standardized component development** and accelerated UI iteration by integrating **Storybook** for isolated component testing and documentation.
- Optimized development and deployment workflows** by leveraging **Docker** to maintain environment parity, significantly improving integration efficiency across microservices.

Strongwill I.T. Solutions

February 2024 - August 2024

Full Stack Developer (Contract)

Remote

- Built and maintained a health management system using Angular, Node.js, NestJS, and MongoDB. Designed secure RESTful APIs and implemented data handling practices aligned with HIPAA compliance requirements. Collaborated with different teams to ensure the system met usability, privacy, and regulatory standards.

PRL BPO Technology Corp.

December 2020 - July 2023

Frontend Developer (Full-time)

Philippines

- Built and maintained a responsive ReactJS and TypeScript web app using MUI for UI components and Vite for efficient builds. Ensured reliability through Cypress testing and implemented multilingual support for global accessibility.

Traxion Tech Inc.

July 2019 - March 2020

Junior Software Developer (Full-time)

Philippines

- Engineered web applications using React, Python, and Django to deliver robust and responsive user experiences. Developed and consumed RESTful APIs and implemented PostgreSQL for secure and efficient data storage. Integrated Stripe to enable seamless and secure payment processing.

EDUCATION

University of the Philippines

Bachelor's, Computer Science
